→ About Us

SAG Tech is a Saudi technology company specializing in the development of digital services and technology products that enable organizations to improve operational efficiency and enhance business growth and sustainability.

We believe that technology—whether delivered as a service or a product—must create measurable and practical value.

→ Vision

To become the most trusted and influential technology partner by delivering advanced solutions that create sustainable value.

→ Mission

To innovate high-quality technology solutions that simplify operations, increase efficiency, and empower organizations with continuous growth and improvement.

→ Why SAG Tech?

01. → Solutions built on the latest technologies

02. → Scalable systems designed for continuous development

03. → Innovation-driven design and automation

04. → Fast implementation with high reliability

05. → Strong focus on quality and long-term impact

06. → Professional customer service and rapid response

→ Our Services

SAG Tech provides integrated services covering the full digital transformation lifecycle, leveraging the latest technologies to ensure higher efficiency, sustainable quality, and scalable solutions that meet client needs.

Artificial Intelligence & Automation (AI & Automation) ←

We provide advanced solutions including data analytics, predictive modeling, natural language processing, pattern recognition, and intelligent automation (RPA).
These services support decision-making, improve performance, and reduce human effort in repetitive processes.

Digital Transformation ←

We help organizations build integrated digital environments including process automation, workflow optimization, and operational restructuring.
Our approach focuses on data-driven business models that enhance sustainability and long-term efficiency.

ERP Systems (Enterprise Resource Planning) ←

We deliver ERP solutions to manage organizational resources and operations through a unified platform covering finance, HR, procurement, inventory, and operational management.

Custom Software Development ←

We develop tailored digital solutions including web systems, enterprise platforms, and mobile applications based on high-quality engineering and scalable architecture.

Licensing & Hardware Supply ←

We provide official software licenses and certified hardware including productivity solutions, cybersecurity systems, and infrastructure devices such as servers and networking equipment.

UX Analysis ←

We conduct comprehensive analysis of user journeys and system interfaces to identify improvement areas and enhance interaction efficiency.

Our Services

UI Design (Interface Design)

We design modern, high-clarity interfaces for systems, applications, and dashboards based on advanced design principles and usability standards.

Internet of Things (IoT Solutions)

We provide IoT solutions to connect devices and systems, collect data, and operate them intelligently in real time.

Government Integrations

We implement integrations with government platforms including compliance systems, HR systems, operational reporting, and data services.

Cybersecurity & Compliance

Our cybersecurity services include vulnerability assessments, penetration testing, security policies, and compliance with standards such as: NCA - PDPL - ISO - OWASP Top 10

Cloud & Local Hosting

We provide secure and flexible hosting environments including both cloud and on-premise infrastructure.

Testing & Quality Assurance

We conduct comprehensive testing including functional, performance, UI, and security testing to ensure product stability and readiness before launch.

Brand Identity Design

We provide professional brand identity design including logos, color schemes, typography, and brand guidelines.

ZATCA API

SAG
ZATCA API

SAG Tech provides the ZATCA API service as a complete technology solution that enables businesses to connect securely and directly with the Fatoora platform of the Zakat, Tax, and Customs Authority (ZATCA), ensuring full compliance with the requirements of Phase Two of electronic invoicing.

What Does the Product Provide?

- Complete infrastructure for integration with ZATCA without the need to build or manage it internally.

- Secure and direct connection to the ZATCA Fatoora platform.

- Issuing, signing, and validating electronic invoices according to official technical standards.

- Embedding QR Codes according to regulatory requirements.

- Automated and real-time invoice submission to ZATCA without manual intervention.

- Technical support and consulting until full integration and compliance are achieved.

- Flexible integration through RESTful APIs with financial systems, accounting software, and POS systems.

- Ability to integrate with ERP and accounting systems such as: SAP - Oracle - QuickBooks - Xero or internally developed systems.

- Unlimited EGS invoicing devices under the same integration environment.

- Pricing model based on the number of invoices issued annually, not the number of devices.

- Minimum 200,000 invoices annually calculated collectively for all connected clients and branches.

- Full API documentation provided.

Why Choose ZATCA API from SAG Tech?

Official ZATCA-approved provider
We operate according to officially approved standards to ensure full regulatory compliance.

Local expertise
A specialized technical team with deep experience in ZATCA projects within Saudi Arabia.

Future scalability
Designed to support business growth and increased operational volume.

Flexible integration
Compatible with any ERP or accounting system.

Infrastructure as a Service (IaaS)
Complete integration infrastructure without internal management.

Continuous technical support
A dedicated support team ensures stable operation and rapid issue resolution.

High security and reliability
Advanced encryption and service continuity.

Full compliance with Saudi regulations
Aligned with Phase Two requirements for electronic invoicing.

Designed for SaaS and multi-client systems
Unlimited EGS devices with aggregated invoice calculation across clients and branches.

Who Is This Service For?

- ✓ Businesses subject to electronic invoicing regulations
- ✓ Software and SaaS companies
- ✓ Multi-branch organizations
- ✓ Custom-built accounting systems
- ✓ ERP and POS providers

SAG Start

SAG Start

SAG Start is a comprehensive technical foundation service provided by SAG Tech to enable startups and newly established companies to launch professionally from day one.

It provides all essential technology requirements within a single integrated solution. We help businesses establish a structured, secure, and scalable digital presence without dealing with multiple vendors or complex technical processes.

What Does the Product Provide?

- Setting up the company's technical infrastructure from scratch.

- Hosting and official email setup.

- Basic cybersecurity and data protection configuration.

- Development of a professional company website reflecting brand identity.

- Integration between website and communication channels.

- Scalable design to support future growth.

- Organized delivery with clear usage guidance.

Why Choose SAG Start?

Future scalability

Technical foundation built to support business growth.

Suitable for non-technical founders

Clear explanation and simple implementation process.

All-in-one solution

Everything you need to launch your business from a single provider.

Continuous support

Dedicated technical support team.

Local market expertise

Understanding Saudi business requirements.

Professional implementation

Adherence to quality, design, and security standards.

Who Is This Service For?

- Startups
- Newly established businesses
- Entrepreneurs
- Companies rebuilding their digital presence
- Any organization seeking a proper technical foundation

SAG Start Packages

Basic Startup Package

Suitable for companies seeking quick launch with essential technology infrastructure. Includes:

- Website hosting and email hosting

Suitable for companies looking for a rapid launch With readily available core technology. Includes:

- All features of the Basic Package
- Brand identity design including:
- Logo - Colors - rand patterns - Basic brand usage guidelines

Comprehensive Startup Package

Suitable for companies that want full control of their website management. Includes:

- Website integrated with CMS (Content Management System)
- Ability to update content, pages, and images without technical assistance
- Clear control panel for website management
- Basic training on system usage

→ SAG Cloud

SAG Cloud

SAG Cloud is a comprehensive cloud hosting and infrastructure service designed to provide a secure, stable, and scalable environment for hosting business systems, applications, and websites.
The service provides a reliable operating environment based on best technical practices, meeting business needs in terms of performance, security, and ease of management.

What Does the Product Provide?

SAG Cloud provides a professional hosting environment that includes all the essential technical requirements for running systems efficiently, including:

- Dedicated cloud servers for systems and applications

- Stable resources ensuring high performance and service continuity

- Support for enterprise systems and internal/external applications

- Scalable architecture without system rebuilding

- Hosting for websites, systems, databases, and APIs

Why Choose SAG Cloud?

Reliable infrastructure

Designed to ensure system stability and business continuity.

Full flexibility

Resources customizable and scalable based on business needs.

High security

Implementation of best security and encryption practices.

Technical support during subscription

Continuous support for server stability and issue resolution.

Single-provider solution

Hosting, configuration, and support from one provider.

Who Is This Service For?

- Medium and large enterprises
- Companies running internal systems or applications
- Software providers and development teams
- SaaS projects and platforms
- Businesses seeking reliable scalable hosting

SAG Cloud Packages

Basic Package

Ready cloud environment

Suitable for companies that need stable and secure hosting to run one or more websites or systems.

- 4 Dedicated CPU Cores
- 8 GB RAM
- Minimum 100 GB NVMe SSD storage
- High monthly bandwidth
- Linux OS (AlmaLinux / Ubuntu)
- PostgreSQL / MySQL database support
- SSL activation and firewall protection
- Stable ready-to-use environment
- Up to 10 email accounts cPanel control panel
- Technical support during subscription

Custom Package

Designed according to client requirements

Suitable for companies with advanced systems or specific requirements.

- Custom CPU, RAM, and storage allocation
- Dedicated scalable infrastructure
- Advanced database support
- Advanced security configuration
- Production and staging environments
- Git deployment setup
- SaaS application hosting
- Integration with external services
- Infrastructure designed for business growth
- Custom control panel options
- Customized support level

→ Our Partners

At SAG Tech, we rely on strategic partnerships to enable our clients to obtain integrated technology solutions including systems, integrations, and certified licenses.

This approach reduces complexity and ensures reliable and scalable technical readiness.

ZATCA Connector Middleware

هيئة الزكاة والضريبة والجمارك
Zakat, Tax and Customs Authority

SAG Tech is an official partner for Middleware services connecting electronic invoicing systems directly with ZATCA.

Our Services Include

→ **Fast Integration:** Efficient solutions enabling quick compliance with ZATCA requirements.

→ **Compatibility with existing systems:** Integration without replacing existing systems or affecting operations.

→ **Continuous technical support:** Ensuring smooth system performance and error-free operation.

→ Odoo System

As an official Odoo partner, we provide specialized services to implement the system according to business needs.

1.Odoo Implementation:

We offer comprehensive Odoo implementation services, from analyzing customer needs and designing suitable solutions to complete system setup and configuration.
We are committed to providing a seamless implementation experience to ensure the system aligns with your business and maximizes its potential.

2.Odoo Customization:

We understand that every business has specialized requirements, so we offer advanced customization services for the Odoo system. This includes developing custom features and modules, modifying the user interface, and adapting the system to suit different operational processes. We work to ensure that the system accurately meets your current and future needs.
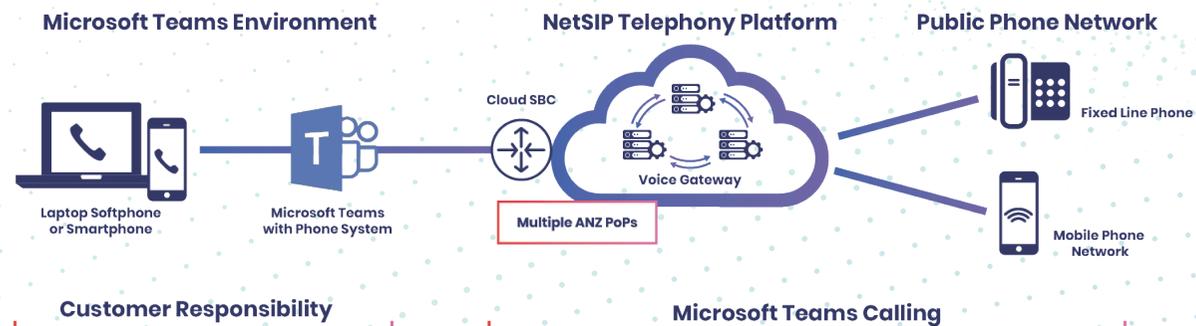

Microsoft Teams Calling System

SAG Tech provides Microsoft Teams Calling System deployment as a full enterprise communication solution enabling businesses to make and receive calls via Microsoft Teams using official phone numbers integrated with telecom providers.

Scope of Services

We offer complete implementation from planning to operation, including:

- Licensing supply based on user count
- SBC deployment and network preparation
- Teams-compatible phone devices
- Full Teams Calling system configuration
- Telecom provider integration and number activation

- Auto Attendant and Call Queue configuration
- Call recording and storage
- Quality testing and system validation
- Client team training
- Post-launch technical support via SLA ticketing system
