## About Us

At SAG Technology (Sahar Abdulaziz Al-Ghalayini Company), we hold a leading position in developing innovative platforms and applications. We rely on high flexibility and an exceptional ability to adapt to the ever-changing market demands, enabling us to bridge technological gaps and deliver high-impact solutions that enhance business value.

## Our mission

We are committed to transforming ideas into innovative and sustainable digital solutions by applying best practices and the latest technologies in software development. Our goal is to empower and support our clients in achieving success through technologies that keep pace with the rapid advancements in the market.

## Our vision

We aspire to become a key driver of digital transformation in Saudi Arabia by providing innovative technology solutions that bridge market gaps and accelerate growth for both businesses and society. Our vision focuses on enhancing sustainability, fostering innovation, and building trust by delivering real value that reflects our ongoing commitment to meeting the evolving needs of our clients.

# Our values

## Latest Technologies

We utilize the latest technologies and the best tools to ensure efficiency in every project we undertake.

## Customer satisfaction

Our clients' satisfaction is our top priority. We work diligently to understand their needs and provide effective, value-added solutions that enhance their business.

## Quality

We set high standards for our performance to ensure reliability and efficiency.

## Innovation

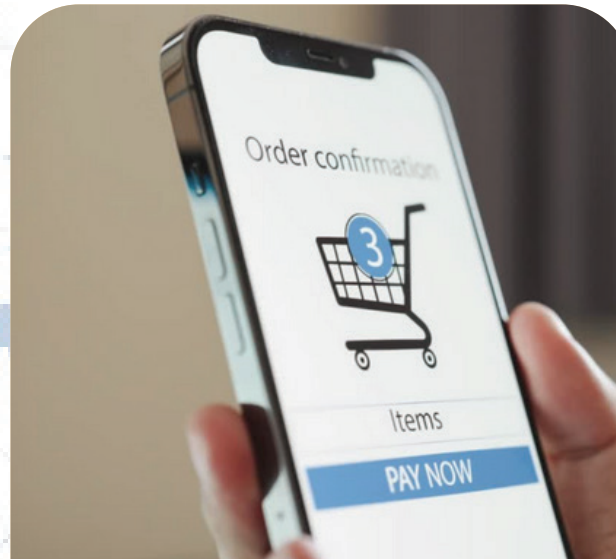

Innovation is a fundamental part of our identity. We continuously strive to adopt and implement new and creative ideas.

# Our services

## Customized Technology Product Development Department

We are pleased to be your technology partner, working to develop and operate technology projects tailored to your specific requirements.

## SAG Technology Products Department

We provide specialized and innovative technology products, offering comprehensive solutions aimed at developing the business sector, addressing challenges.

## Technical Services Department for Startups and Digital Transformation services

We prepare and build the technical infrastructure necessary for your business success through a comprehensive range of integrated services.

# Our Technologies

## Apps Development

We provide smart application development services across various platforms like iOS and Android, ensuring seamless user experiences and innovative digital solutions that meet business needs.

## 3D Printing

At SAG Technology, we provide cutting-edge 3D printing services, allowing us to transform concepts into tangible models. We support innovative and precise prototyping for industries such as manufacturing, healthcare, and engineering, bringing ideas to life using the latest 3D printing technologies.

## Web development

We provide innovative and advanced web platform development services for both companies and individuals, aiming to deliver exceptional and effective user experiences. Our work includes designing and developing dynamic websites and professional applications that comprehensively meet clients' needs, ensuring functionality, efficiency, and a seamless digital experience.

## Data Collection & Visualization

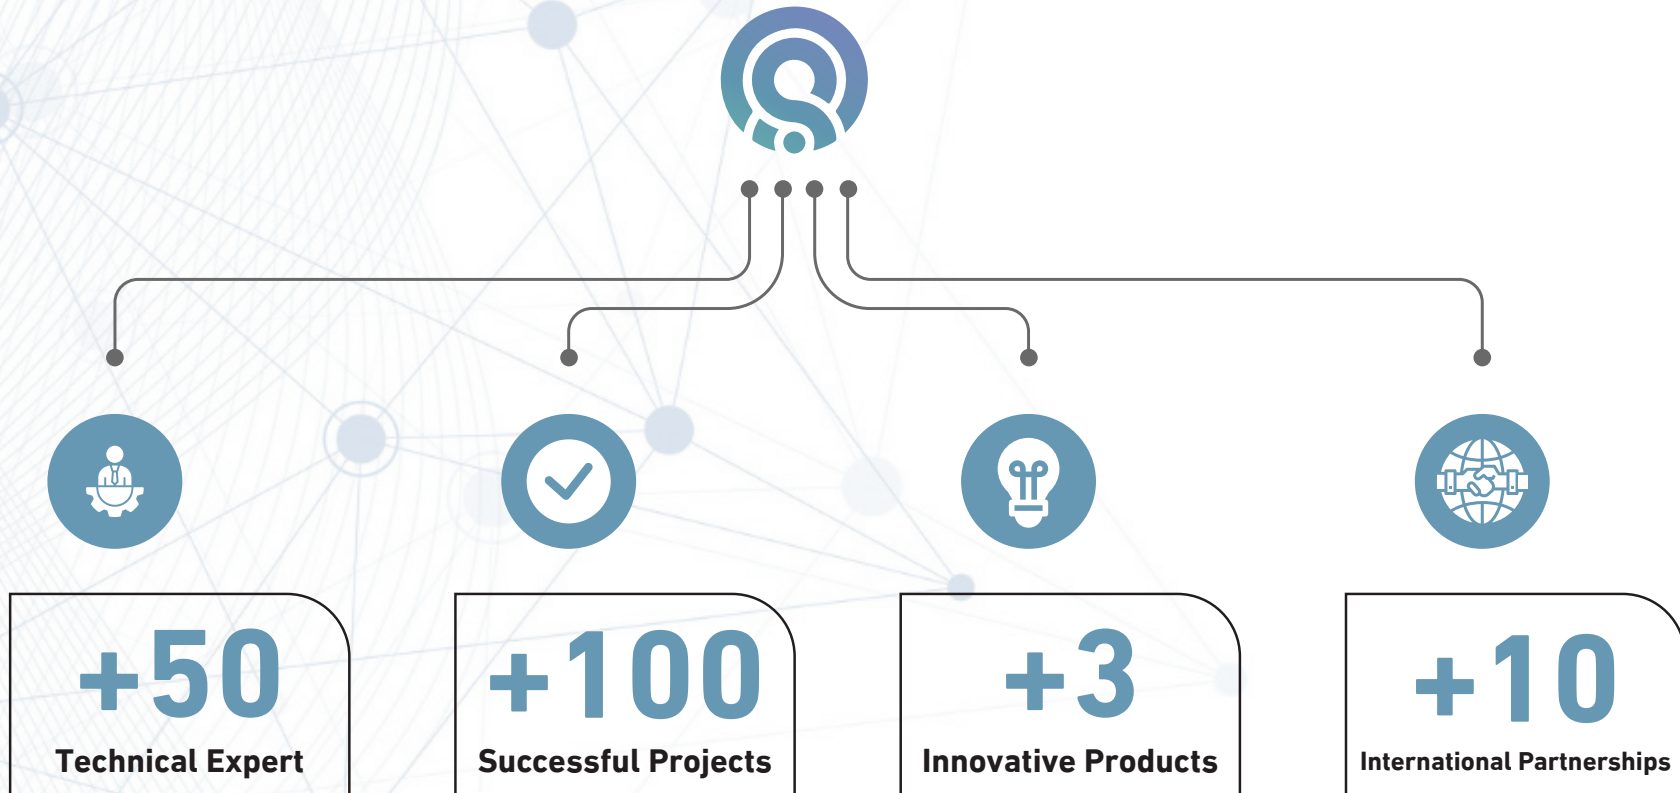

We deliver comprehensive solutions for collecting data from multiple sources and visualizing it effectively enabling businesses to gain insights quickly, supporting accurate and strategic decision-making.

## Cybersecurity

We prioritize strong and innovative cybersecurity to protect data and systems from threats. Our specialists provide consulting and implementation services, ensuring effective resource security and continuous system protection.

# Our achievements

# Our products

## Saded HR system:

Seamless integration and efficient HR management. A fully customizable system designed for each company, featuring a mobile application for employees that runs on the client's private server. The system is fully compliant with Saudi labor law, social insurance regulations, and the Mudad platform.

## VATECH:

A comprehensive and cloud-based accounting system, ensuring easy access and full compliance with electronic invoicing phases.

# Our Partners

هيئة الزكاة والضريبة والجمارك  
 Zakat, Tax and Customs Authority

## ZATCA Connector Middleware

At SAG Technology, we are an official partner for providing Middleware services to seamlessly integrate our clients' electronic invoicing systems with the Zakat, Tax, and Customs Authority (ZATCA), fully compliant with Phase 2 requirements of electronic invoicing.

### Our Services Include:

- 
**Fast Integration:** We provide effective and rapid integration solutions to ensure full compliance with ZATCA requirements in a short time with the highest efficiency.
- 
**Compatibility with Existing Systems:** We integrate your electronic invoicing software with ZATCA smoothly, without the need to replace your existing systems or disrupt operations.
- 
**Continuous Technical Support:** We offer ongoing technical support to ensure a seamless and error-free system experience for our clients.

# Our Partners

**odoo**

## Odoo system:

As a certified Odoo partner, we provide specialized and comprehensive services to support clients in implementing and customizing the system according to their specific needs.

### 1. Odoo Implementation:

We offer comprehensive Odoo implementation services, starting from analyzing client needs and designing tailored solutions to full system setup and configuration. We ensure a smooth implementation experience, aligning the system with your business operations to maximize its efficiency and benefits.

### 2. Odoo Customization:

We understand that every business has unique requirements, so we offer advanced Odoo customization services. This includes developing custom features and modules, modifying the user interface, and adapting the system to fit various operational needs. We ensure that the system precisely meets both current and future business demands.

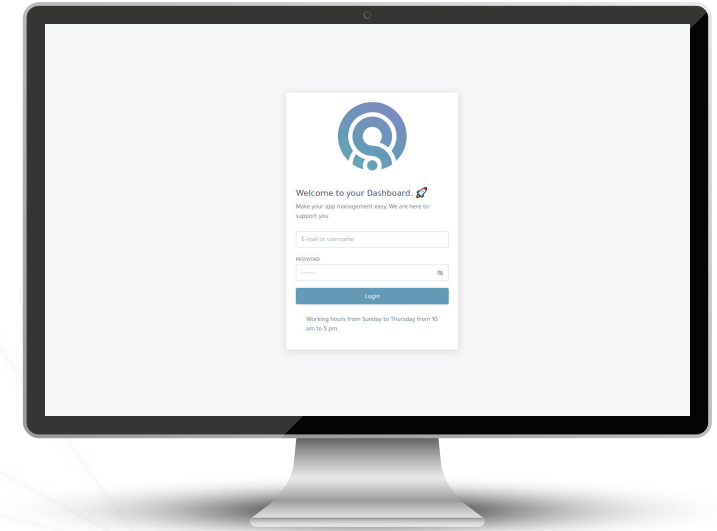

## Technical Support via the Ticketing System

At SAG Technology, we strive to provide fast and reliable technical support to ensure business continuity with high efficiency. Through our dedicated ticketing system, we offer an advanced platform that allows clients to submit and track their requests easily and transparently.
